Sprint 4 Report, TSR Assistant, Drowning with Ducks, 12/3/17

Sprint 4 Ends 12/3/17

Actions to stop doing: The team should stop not checking which branch is being modified/pushed so that team members do not push in other branches and accidently wipe any work/progress being made.

Actions to start doing: The team should start thinking about why we didn't do more code reviews because the code could be cleaner, more efficient, and simpler with more eyes and ideas.

Actions to keep doing: Honest and open communication on clarifications,problems,and frequently committing should be continued. Open communication leads to quick trouble shooting and the resolution of issues.

Work completed/ not completed:
Completed:
- **User Story 1 (**As a developer, I would like to have a clean codebase.)
- **User Story 2 (**As an instructor, I would like to only see flags relevant to the selected TSRs.)
- **User Story 4 (**As an instructor, I would like to have a pleasant viewing experience.)

Not completed:
- **User Story 3 (**As a developer, I would like to see analysis on the textual feedback given by students. - moved to product backlog)

Work Completion Rate:
- 3 user stories completed. 1 user story uncompleted.
- 22 estimated ideal work hours completed.
- 14 day sprint.
- .214 of a user story completed per day.
- 1.57 ideal work hours per day.
- Burn Up Charts available in the repository
